

# tact

La dalle podotactile est une surface texturée que les personnes mal voyantes ou non voyantes peuvent reconnaître au toucher. Ce dispositif a pour finalités l'autonomie, l'inclusion et la sécurité de ces personnes au sein de l'environnement urbain. Seul problème :

Elles préviennent d'un danger.

Mais ne précisent jamais lequel...

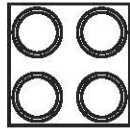

1.a

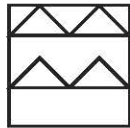

lecture  
tactile pas  
très claire

1.b

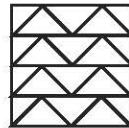

mieux

2.a

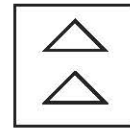

efficace

2.b

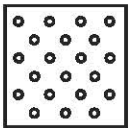

plus aussi  
efficace

2.c

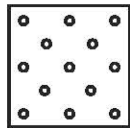

efficace mais  
dangereux  
(trébucher)

3.a

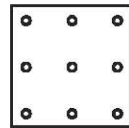

inefficace  
trop serré

3.b

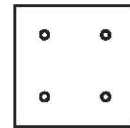

mieux

3.c

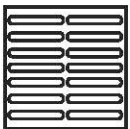

encore  
mieux

3.d

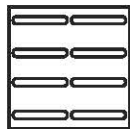

trop espacé  
(confusion)

4.a

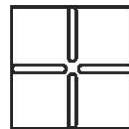

pas assez  
précis

4.b

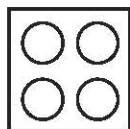

peut-être  
confondu avec  
une bande de  
guidage

4.c

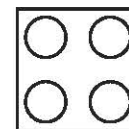

changement  
de position  
mieux

5.a

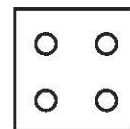

moyen

5.b

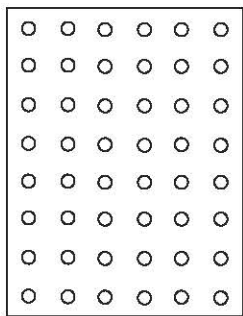

ressemble trop à  
la bande podo-  
tactile classique

5.c

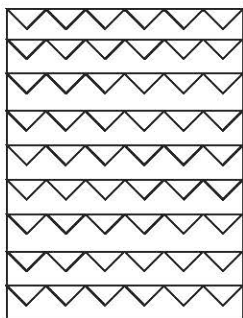

retour à la  
bande podotac-  
tile classique
